Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1-20-06 has been entered.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The rejection of claims 28, 32-41, and 45-49 under 35 USC 103(a) set forth in the prior Office Action is withdrawn in response to Applicant's arguments filed 1-20-06, and amendment filed 3-24-06. Specifically, Applicants have provided convincing evidence (see Gruberg 2000, and the Kutryk et al. (2002) discussed in the Weller Declaration) that at the time the instant invention was made there was a significant level of unpredictability associated with making predictions of efficacy of antirestenotic treatment in humans based upon efficacy in animal models. Therefore, although it would have been obvious for the skilled artisan to have modified antisense targeting *c-myc* with morpholino modifications for use in a method for treating restenosis in a human at the time the instant invention was made, there was no reasonable expectation of success of an antirestenotic treatment in humans using morpholino modified oligomers based upon efficacy observed in an animal model using a phosphorothioate modified oligomer.
